

Everything you love about QuickBooks, combined with our best-in-class processing services.

Integrated payments for QuickBooks – *fast, easy, secure.*

We've designed an in-house QuickBooks plugin that allows you to not only process transactions via our gateway, but also create accounting entries and automatically mark transactions as 'paid' without ever leaving the QuickBooks environment.

The screenshot shows a payment form with the following fields:

- QuickBooks Customer: Nick Smith
- Invoice #: 1040
- Account Type*: Visa
- Card Alias: -New card-
- Account/Card #: *****1111
- Expiration*: 02-20
- CVV: 123
- Amount: 435.78
- Currency*: USD
- Name*: The Card Shoppe
- Address: 1000 Continental Dr
- City: King Of Prussia
- State: PA
- Zip Code: 19406
- Country: USA
- Email: nick@thecardshoppe.com
- Store Profile: Default

Buttons: Make Payment, Cancel

* - Mandatory to Process

Low-Rate Processing

In addition to accommodating a variety of customer payment preferences (credit, debit, eCheck, etc.), you'll also receive the lowest possible rate for each transaction thanks to our gateway's interchange optimization feature.

Security You Deserve

CardSecure®, our industry-leading security solution elevates the QuickBooks platform by instantly encrypting and tokenizing every transaction, resulting in PCI scope reduction and the ultimate data breach protection.

Dynamic Reporting & Reconciliation

Our gateway collects fundamental business data (settlements, deposits and statements) all in one place. Better yet, our customizable reconciliation solution ensures reconciling cash-to-receipts is integrated and automated.

Immediate Set-Up

Our streamlined installation means you can start processing transactions within QuickBooks via the VMS gateway immediately – no wait time necessary. Should you run into an issue, our support team is readily available to assist you – 24/7.

Our QuickBooks plugin is fully integrated with the VMS MerchantCenter. Log in from any browser or mobile device to see full transaction lifecycle reporting, manage transactions, store customer profiles and much more. vms.merchantinfoonline.com
